

# Paper Garland Instructions

Pumpkins and spiders and ghosts -- oh, my! Get into the spirit of Halloween with a ghoulishly good garland.

**Materials:**  
**Construction Paper**  
**Tape or Glue**  
**Raffia or String or Yarn**  
**Scissors**

**Step 1: Print Designs on Printer Paper**  
Load paper following printer instructions. (Handle paper by the edges to avoid fingerprints.) Print **Paper Garland Template** using your ink jet printer. (For best results, load only one sheet at a time.)

**Step 2: Dry**  
Let paper dry several minutes before handling.

**Step 3: Cut**  
Cut out designs along the dotted lines.

**Step 4: Cut Construction Paper & Glue/Tape Together**  
Using your favorite Halloween colored-construction paper, cut four pieces 4.5" x 12". Fold each piece in half so they're 4.5" x 6". Glue or tape the bottom of the construction paper together.

**Step 5: Adhere Designs to Construction Paper**  
Stick the designs onto the four 4.5" x 6" pieces of construction paper using tape or glue.

**Step 6: Hang**  
Using raffia, string, or yarn, thread all four pieces together, then hang or display on a window, wall, doorway, or mantel.

**Tips & Tricks:**  
You can buy specially made adhesive-backed Sticker Paper for ink jet printers to use instead of regular printer paper and a glue stick.

- To select the proper print settings in Adobe Acrobat click Print; in the print dialog box, select Properties; choose the appropriate paper type and then select the highest print quality.
- We recommend that you run a test print on regular paper to double check the layout and design. (If problems occur, check your printer manual for additional printing instructions.)
